Professional Summary

I'm a passionate Senior Frontend Developer with over two years of experience in building responsive, user-friendly websites using HTML, CSS, JavaScript, jQuery, and Bootstrap 5. Currently at Eze Technologies (Bahawalpur), I lead the frontend for EzeAD.com, a major Canadian classifieds platform with multiple child sites—focused on clean, high-performance interfaces and seamless backend integration.Alongside this, I also developed a dynamic full-stack website called OldKare, where everything from content to listings is fully managed through the admin panel.Previously, I worked as Team Lead at EvonicSoft, delivering ThemeForest-quality, multilingual websites and mentoring junior developers. I also completed a 3-month remote contract with Devsyntrix (Lahore), where I built modern, responsive UI components.I thrive in fast-paced environments and take pride in solving problems creatively and delivering high-quality results.

Work Experience

Frontend Development at Eze Technologies Bahawalpur

I work at Eze Technologies, a Bahawalpur-based company, where I lead frontend development for EzeAD.com, a major Canadian classifieds platform. I turn Figma designs into responsive interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap 5. I also handle dynamic sections like search filters, galleries, and banners, and assist with small PHP tasks for backend integration. Visit **ezead.com**

Developed Oldkare FullStack Website Using Core PHP

Developed Oldkare, a full-stack website built with Core PHP featuring a fully dynamic admin panel. The admin can easily manage and upload all website content, including text, images, and user data, without any coding. This project highlights my expertise in backend development, database integration, and building user-friendly, responsive websites.

Work Experience

Frontend Development at EvonicSoft Lahore

Worked as a frontend developer at EvonicSoft Company in Lahore. I developed responsive, mobile-friendly interfaces using HTML, CSS, and Bootstrap,Javascript and Jquery enhancing cross-device user experience. Ensured clean, modular code practices for easy maintenance and scalability, allowing future developers to work efficiently on existing projects. Optimized code structure and asset management, resulting in faster load times and improved SEO rankings, which enhanced the visibility and usability of company websites.

Projects

Chirolift - Physiotherapy & Chiropractic:

I developed Chirolift – Physiotherapy & Chiropractic, a modern, responsive website for a clinic offering physiotherapy and chiropractic services. The project focuses on clean UI, user-friendly navigation, and optimized performance for a seamless patient experience.This project was also successfully uploaded to ThemeForest, meeting their high coding and design standards. Visit = **https://themeforest.net/item/chirolift-physiotherapy-chiropractic-html5-website/54306022**

LINQBUZZ-Blog-Magazine:

I developed LINQBUZZ – Blog & Magazine, a fully responsive and feature-rich website template designed for blogs, news, and magazine platforms. The clean layout, category-based content structure, and modern UI enhance readability and user engagement. This project was also successfully uploaded to ThemeForest, meeting their high coding and design standards. Visit = **https://themeforest.net/item/linqbuzz-blog-magazine-html5-template/54374892**

InventionAIs - AI Startups & Technology :

I developed InventionAIs – AI Startups & Technology, a sleek and responsive website template tailored for AI startups, tech companies, and innovation-driven businesses. The design highlights cutting-edge features, services, and use cases with a modern, tech-focused UI.
